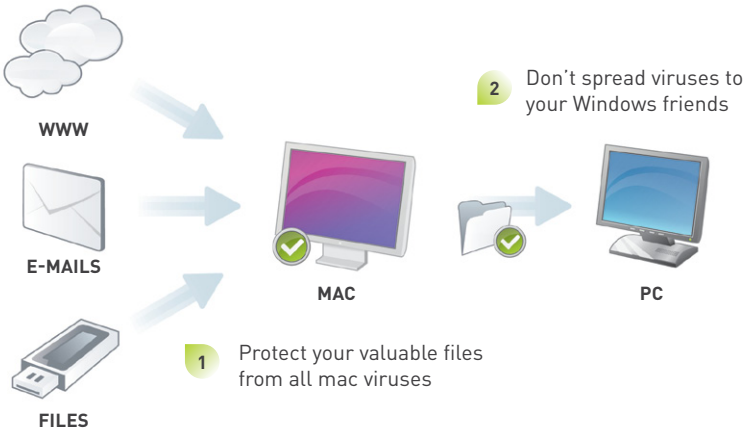
Superior Antivirus & Anti-phishing Protection For Mac

Think Macs don't catch viruses? Think again! Although Macs are traditionally believed to be less prone to cyber-criminal attacks, recent developments have shown that malware writers are concentrating more and more on finding vulnerabilities in MacOS and popular Mac applications. BitDefender Antivirus for Mac proactively protects Macs against the new breed of Mac viruses. Plus, it destroys Windows viruses (which don't affect Macs) so that you don't accidentally pass them on to your family, friends and colleagues using PCs.



Key Benefits

- ✓ Protects your valuable files and documents from all Mac viruses
- ✓ Blocks webpages that attempt to steal your credit card data
- ✓ Prevents you from passing viruses along to your friends working on Windows machines
- ✓ Uses minimal system resources – won't slow you down
- ✓ Free 24/7 technical support

Description
Last scan was on 11/11/10 4:13 PM. Real-time protection is ENABLED.
Real-time protection ensures that all files are scanned as they are accessed by you or an application running on this system. On-demand scanning allows detecting and removing malware that already resides in the system. It is recommended to keep real-time protection enabled at all times, and to scan regularly your computer.

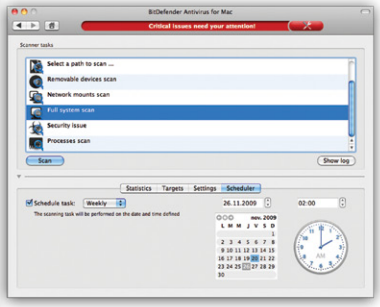
bitdefender



BitDefender blocks Mac viruses that can:

- Delete valuable files and documents
- Steal passwords or credit card data
- Allow remote control over your Mac
- Cause system slowdowns and crashes
- Disable the firewall and update service

SYSTEM REQUIREMENTS

- Intel-based Macintosh running one of the following operating systems:
  → Mac OS X Tiger (10.4.6 or later)
  → Mac OS X Leopard (10.5 or later)
  → Mac OS X Snow Leopard (10.6 or later)
- 1 GB of RAM Memory
- 200 MB available hard disk space
- Normal (4:3) display resolution: 1024 x 768
- Wide display resolution: 1024 x 640

STOP VIRUSES AND SPYWARE COLD

Detect and remove any type of Internet threat targeting Mac, Windows, or Unix/Linux operating systems.

BLOCK PHISHING ATTACKS

Shut-out websites that attempt to steal your credit card data or other personal information.

SCHEDULE SCANS AROUND YOUR SCHEDULE

Plan ahead and schedule your full system/drive scans in the off hours, when your Mac is not in use.

QUARANTINE SUSPICIOUS DOCUMENTS

Move infected or suspected files to a special "safe zone", before forwarding them to the BitDefender Antivirus Lab for further investigation.

FAMILIAR MAC INTERFACE

Use the BitDefender dock icon to get access to the most common tasks or to drag & drop files on it for quick scanning.

ALWAYS UP-TO-DATE

BitDefender continuously and automatically checks our global databases to keep your system safeguarded against the latest strains of online threats.

FIND SUPPORT FAST

Enjoy free technical assistance for the entire duration of your software license
